Dear Sophie,

## **RESPONSE TO SYDNEY METRO REQUEST FOR INFORMATION – 372-382A PITT STREET, SYDNEY (D/2021/1504)**

On behalf of the Proponent, thank you for meeting with us on the 17 February 2021 to discuss the Request for Further Information (RFI) issued by Sydney Metro (dated 24 January 2022).

As noted at this meeting, the Concept Development Application (D/2021/1504) was lodged on 17 December 2021 and included several technical reports which sought to assess the potential for impacts on the rail and metro corridor tunnels as a result of the proposed development.

These technical reports are listed below and attached to this letter for ease of reference:

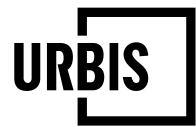

- Rail and Metro Corridor Impact Assessment – **Attachment A**
- Noise and Vibration Impact Assessment – **Attachment B**
- Preliminary Structural Assessment – **Attachment C**
- Geotechnical Report – **Attachment D**

We trust the information provided addresses the matters raised within the RFI and will enable Sydney Metro to make a decision on the granting of concurrence.

Kind regards,

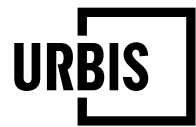

A handwritten signature in dark ink, appearing to read "Kate Riley".
